

Food Safety and Dining

Pulaski Academy's food service, SAGE, has rethought and reconfigured every element of the dining experience to prepare varied meals with fresh ingredients that are presented in an appealing way. All SAGE personnel will have thorough training, will wear proper PPE, and will work in a way that minimizes person-to-person contact. Additionally, arrangements have been made to achieve the highest level of safety regarding product delivery and storage by minimizing the number of delivery trucks, ensuring that products are safe, and cleaning all areas of the kitchen in accordance with CDC guidelines. In all divisions, SAGE will prepare pre-portioned, pre-packaged meals that will eliminate self-service food bars, maintain touchless drink stations, and touchless/cashless checkout. Early Childhood and Lower School students will eat in their classrooms and will pre-order their meals so that they can be delivered on time and freshly prepared. Middle and Upper School students will also order pre-packaged meals, pick them up in designated areas in their building, and return to their classrooms to eat.
